

# 10 SONO

## NANO BUBBLE SYSTEM

- Maximized the skin absorption of the cosmetic active ingredients
- High density ultrasound procedure

### NBS (Nano Bubble System)

- Nano-sized microbubbles.
- Patented ingredients that react to the ultrasound energy (microbubbles)
- Increase skin absorption rate of active ingredients

### DSS (Dual Sono System)

- Dual-Frequency Mode for FACE(3/10MHz) and BODY (1/3MHz) among three multi-frequencies of 1/3/10MHz
- Delivering high density ultrasonic vibration to aged skin cell
- Promotion of cell activity
- The skincare procedure without downtime

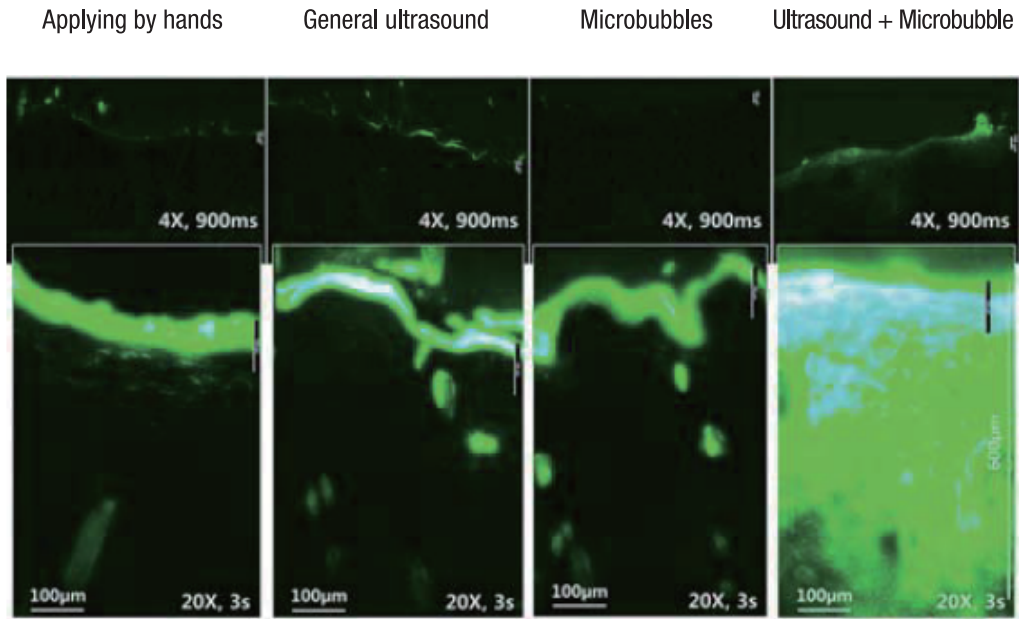

## Nano-sized microbubbles development for special purpose

\*A patented raw material was developed (microbubbles) that reacts to ultrasound energy as helping the absorption rate of active ingredients to skin.

However, there may be differences depending on the usage environment and individual skin conditions.

# Synergistic effect between ultrasound energy and microbubbles

**1,700 times more absorbent compared to by hands**

“Cosmetic active ingredients are not easily absorbed by the theory of 500 daltons.”

Cosmetic active ingredients shall be absorbent, not applying.

**A. Acerola C ampoule 30ml**

Ingredient for whitening and wrinkle improvement

Natural vitamin called Acerola C makes skin get brighten and good skin care

**Hyaluronic Ampoule 30ml**

Ingredient for whitening and wrinkle improvement

Low molecule hyaluronic acid fill from inside of the skin and moisturize skin care
